1 : INTRODUCTION

Fight Covid19 website supports the COVID-19 vaccines rollout in India seeks to disseminate timely, accurate and transparent information about the vaccine(s) to alleviate apprehensions about the vaccine, ensure its acceptance and encourage uptake. The strategy will also serve to guide national, state and district level communication activities, so that the information on the COVID-19 vaccines and vaccination process reaches all people, across all states in the country.

The strategy is to build an Covid-19 website that not only take the vaccination request but also take the plasma donated , plasma request ,essential items donate, essential items request. Common side-effects of coronavirus vaccine you should not worry about Symptoms. Learn What are the Do's and Don'ts of Coronavirus to Protect Yourself.

The main aim is seeks to build trust and enable greater confidence in the COVID-19 vaccine amongst all people by employing transparency in communication, while also managing any mis/disinformation and rumors around it.

1.1 Existing System and Need for System

Existing System:

- Manual process to register for vaccination or plasma process.
- Time saving and effort saving.
- Increases transparency.
- Reduces the errors.

Need for the System:

Covid-19 system is an end to end solution that has utilities for the entire public health system from national up to the vaccinator level. The system allows for creation of users (admins, supervisors, vaccinators), registration of beneficiaries (bulk upload and individual registration), facilities/planning unit and session sites followed by planning and scheduling sessions and implementation of vaccination process.

1.2 Scope of Work

THE SCOPE OF THE SYSTEM IS AS FOLLOWS

- It maintains the information of the user & admin.

FIGHT COVID-19

- Admin can add, delete, search all vaccine center, plasma ,essential items, vaccine detail.
- Admin can manage User data.
- Admin can accept all the plasma request ,essential items request, vaccination request

1.3 Operating Environment – Hardware and Software

At Server Side:

Hardware Configuration

Name	Details
Processor	Intel(R) Core(TM)i5, Intel(R) Core(TM)i3
RAM	4GB OR Higher
Hard Drive	20GB OR Higher

Software Environment

Name	Details
Operating System	Windows 7,8,10
Browser	Chrome
IDE	Eclipse
Server	Xampp , Tomcat

FIGHT COVID-19

4.2 Client Side:

Hardware Configuration

Name	Details
Processor	Intel(R) Core(TM)i5, Intel(R) Core(TM)i3
RAM	512 MB OR Higher
Hard Drive	20GB OR Higher

Software Environment

Name	Details
Operating System	Windows 7,8,10
Browser	Chrome

1.4 Detail Description of Technology Used:

JAVA:-

Web-based Applications Java is also used to develop web applications. It provides a vast support for web applications through Servlets, Struts or JSPs. With the help of these technologies, you can develop any kind of web application that you require.

JSP:-

It stands for Java Server Pages.

It is a server side technology. It is used for creating web application. It is used to create dynamic web content. In this JSP tags are used to insert JAVA code into HTML pages. It is an advanced version of Servlet Technology. It is a Web based technology helps us to create dynamic and platform independent web pages. In this, Java code can be inserted in HTML/ XML pages or both.

JSP is first converted into servlet by JSP container before processing the client's request.

CSS:-

CSS is used to describe the presentation of Web pages. It also makes the web page responsive to different devices.

SQL:-

SQL is used to communicate with a database. As the standard language for relational database management systems, SQL statements are used to perform tasks such as update data on a database, or retrieve data from a database.

2 : PROPOSED SYSTEM

2.1 Proposed System

Fight covid 19 enables users to register online. After registration he/she can login and can able to see the vaccination centers by just adding the pincode of their city and check where vaccine is available. Also User able to see the status of their vaccination.

They can able to donate plasma and essential products by filling the given form.

2.2 Objectives of System

- The main objective of the Project on Fight Covid-19 is to manage the details of user, vaccination center, plasma donated, plasma request, essential items donate, essential items request, vaccination request, medicine.
 - Manage the information of user.
 - Shows the information and description of the Common side-effects of coronavirus vaccine.
 - Editing, adding and updating of Records is improved which results in proper resource management of data.
 - Manage the information of Vaccine Request
-

2.3 USER REQUIREMENTS

2.3.1 Functional Requirements

- Easily search centers for vaccination or plasma donate/request.

2.3.2 Non Functional Requirements

- Since the system is web based system, page delays shall be minimized to the possible limit so that the users do not get annoyed.
- The system will search record within a short period of time.

3 : ANALYSIS & DESIGN

4 USER MANUAL

4.1 User Manual

In this project after opening the website we will see Home Page. On Home page we will see option such as Home, Medicine, Common side effects, FAQ, About Us and Login. If user click on Medicine He/She can view home remedies which can help to increase the immune system. If user click on Common side effects he/she will see information about symptoms of corona virus so that it will help them to understand the disease and take precaution. If user selects FAQ he/she can have access to updated FAQs about corona virus. On clicking About us user will information about website. In login section there is two types of login Admin login & User login

- Admin can login with his/her username and password. He/She can add ,delete view vaccination request ,plasma request and essential request also he can add the center detail for vaccination. After performing the task he can logout from the website.
- User can register and He/She can login in the website. He can register for vaccination can also request/donate Plasma and Essential item through this website. User have the option to view the requested task for vaccination ,plasma and essential item. User also have access to view already updated FQA ,Common symptom so that it will help them to understand the disease and take precaution also he can check our medication section where home remedies are provided which can help to increase the immune system .

FIGHT COVID-19

5 Drawbacks and limitations

- In remote areas where you aren't able to get on the Internet, this system might not be for you. You'll need reliable Internet access to check your plasma request and to get vaccine appointment that are made online.

- Drawback of system is generally related to security. It is considered to be a matter of concern in case you go online without enough protection which can create some big problems related to security.

FIGHT COVID-19

6 : Proposed Enhancements:

- Third party NGO, corporates can request to conduct vaccine camp.
- News update related to covid19 will display in notification selection.
- We will add more feature in Plasma donation and request where user can able see his\her donar details and directly get in touch with them as per their location.
- We will add separate section were covid fighters can share their inspiring story which will motivate other people

7 : Conclusion

We have created web-site to help user's to get detail information about covid- 19 and they can able to find nearest covid center for get vaccine. It's user-friendly and have features like search nearest Vaccine center , register for vaccine and get advice of best doctors, and also get the information about the home remedies.

- Website helps to explore information about covid.
- This website also help use to under stand the symtoms and how we can protect us from covid
- The website would work in any environment as connecting to the internet is flexible and would not give any problems.
- Any changes made in the website in future ,will not affect the other functioning of the website.
- This website can be viewed as a means of saving and time

we can also expand features in future so it can help everyone hospitals to maintain there vaccination center.

All patners of international community and country leaders are encouraged to proactively take strategic actions as soon as possible to fight the covid-19 together.

Hard times will end finally , and we will meet each other in the blooming spring soon.

HOME REMEDIES & MEDICAL TREATMENTS

The world has been facing an unprecedented crisis for the past several months. Coronavirus (COVID-19) has affected almost all countries and there is still no sign of an effective vaccine. The only known ways to protect ourselves from this virus are - maintaining proper hygiene and following social distancing. However, there are other ways that might boost your immunity and offer protection from various infections.

Home Remedies:
These home remedies are easy to make and might help strengthen your immune system as well. These are effective and are recommended by several traditional medical practitioners too.

Warm turmeric milk

The next suggestion by the ministry is to drink warm milk with ½ tsp Turmeric every morning and evening. Turmeric milk has therapeutic properties that help the body in recovering from a disease or injury quickly. Haldi doodh is useful in speeding up the healing process of the body and shielding it with

Kadha

This homemade tulsi kadha for immunity might help improve your digestion as well. It might offer relief from any kind of cold or flu. You can have this tulsi ka kadha 1-2 times a day as it might boost your immune system and it may help fight infections as well. Also, this immunity boosting kadha has been recommended by the Ministry of Health and Family Welfare as well.

Ingredients:
4-5 Tulsi leaves, 1 Ginger, 3-4 Raisins, Black pepper powder (1/4 teaspoon), Cinnamon powder (1/2 teaspoon), water.

How to prepare:

- two glasses of water in a pan
- Add tulsi, black pepper powder, cinnamon powder, ginger and raisin
- You can also add honey this will help to relieve coughs more effectively
- Stir this mixture and let it boil for around 15 mins
- Let it cool down for a while and then strain it using a strainer

How does the coronavirus (COVID-19) spread, and how can we observe it?

Coronavirus (COVID-19) is spreading between people to people when a sick person coughs or sneezes in front of others. The coronavirus can impact us if any affected person sneezes or coughs on other people or things. The virus can also harm us if the infected person have coughed or sneezed on a surface (like a door handle, balcony grill), and we touch the particular surface or the person's hand. The droplets of the infected person infects our hands and the viruses is transferred through our nose, eyes, or mouth into our body.

Symptoms of coronavirus	
Common Symptoms	Respiratory symptoms Fever Cough Shortness of breath Breathing difficulties
Less common symptoms	Diarrhea Gastrointestinal symptoms
Severe cases	Pneumonia Severe acute respiratory Syndrome Kidney failure Death

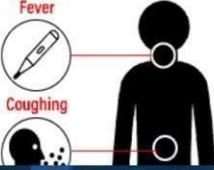

FIGHT COVID-19

The screenshot shows a web browser window with the title "Fight Covid19". The address bar shows "localhost:8080/Covid_19/CSE.jsp". The page content includes a list of handwashing instructions, a paragraph about social distancing, and a table with three columns: ACTIONS TAKEN, SYMPTOMS, and PREVENTION.

- Interlock fingers and rub the back of fingers on opposite palms.
- Then rinse hands with water.

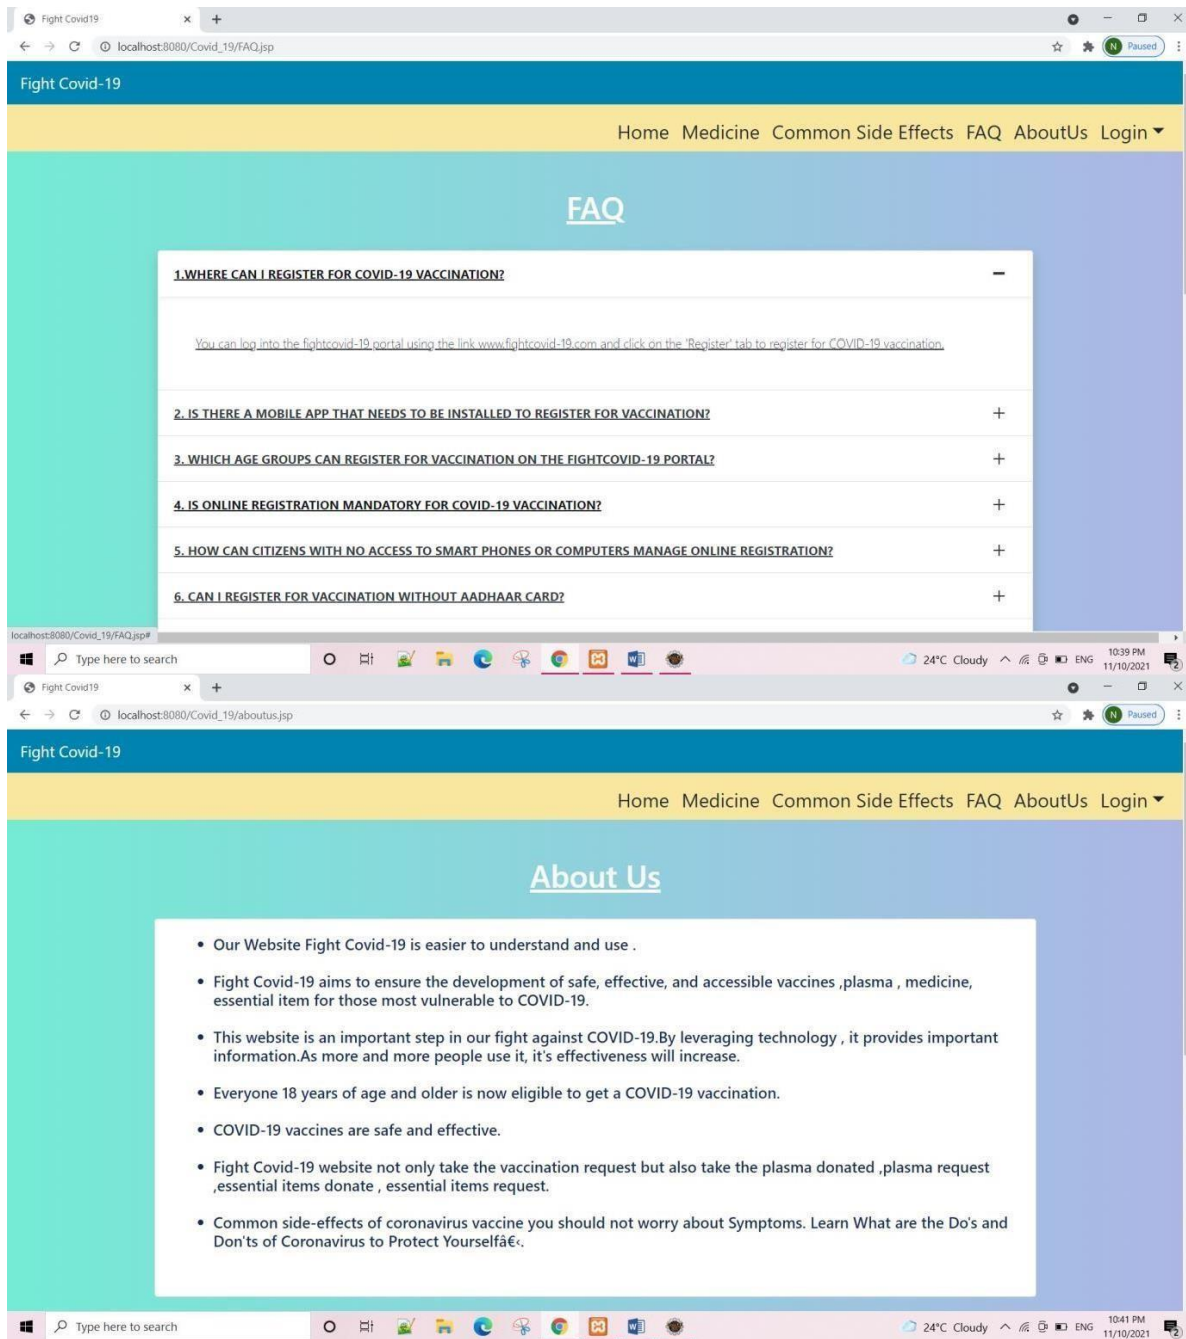

Washing our hands correctly is one of the best things we do to protect ourselves from coronavirus. Try to stay away for at least 1.5 meters from the particular infected person who is coughing or sneezing. Even if they do not have the infection of coronavirus (COVID-19), they can transfer germs. So be careful all the time, and social distancing is also a type to prevent us from COVID-19. We have to follow these rules for social distancing:

- Stay home as much as possible.
- Keep 5 meters distancing from others.
- Avoid handshaking, kissing, or hugging to others.
- Work from home and avoid outing.
- Avoid gatherings and crowded places.
- Avoid touching nose, mouth, and eyes frequently.

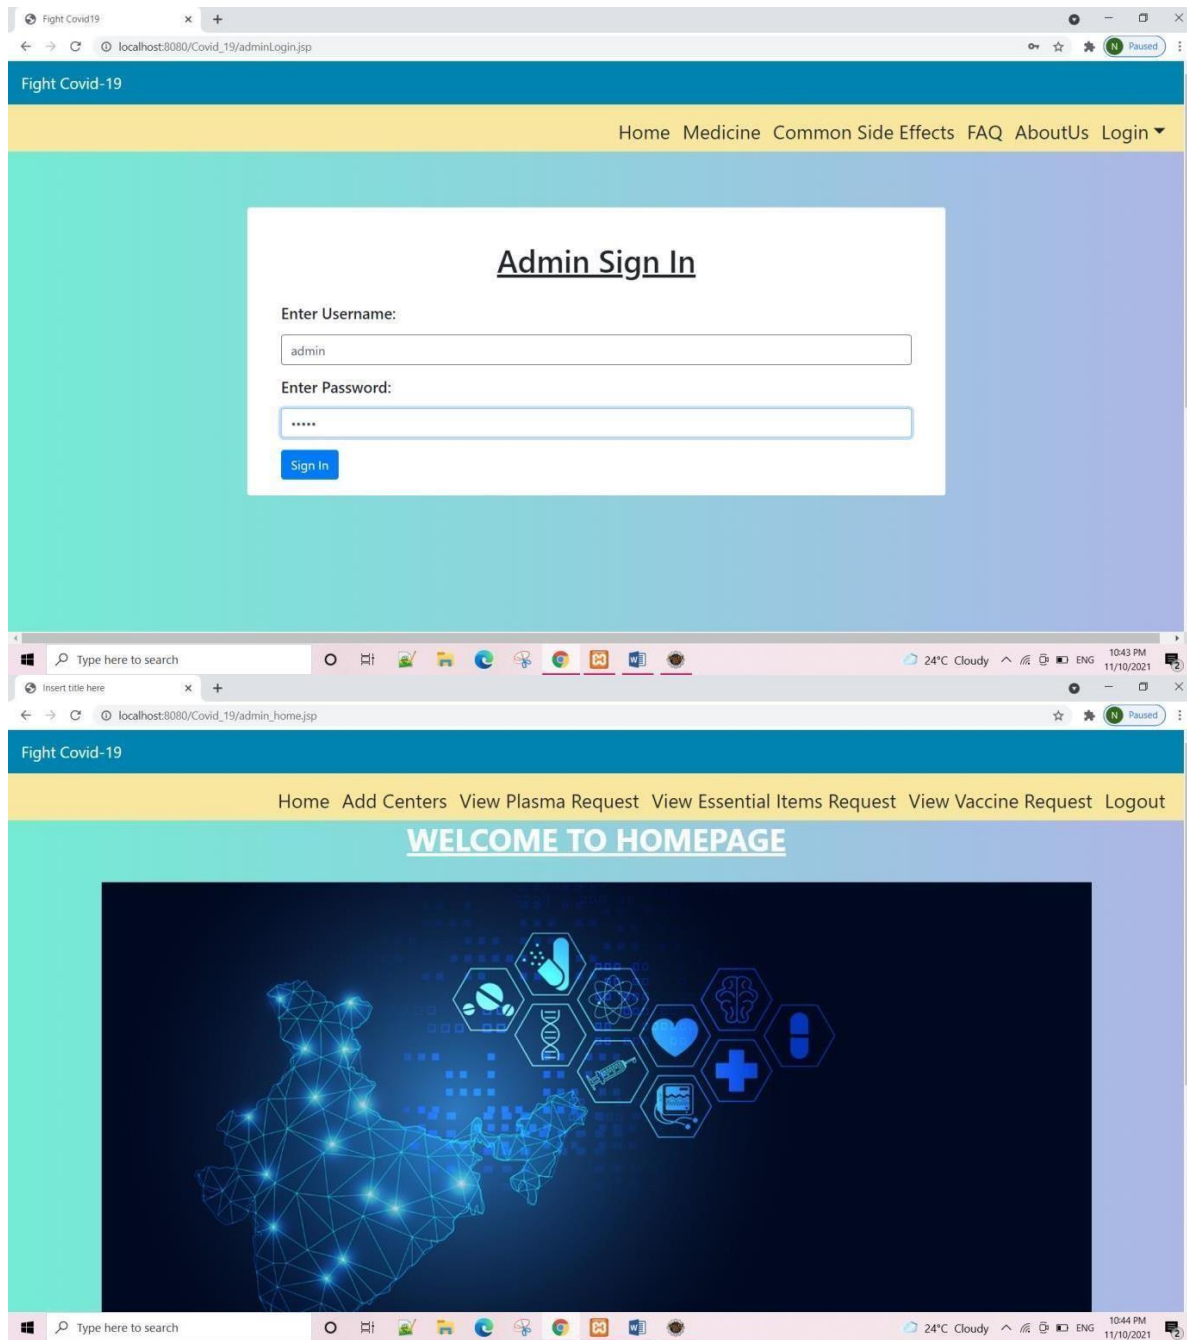

ACTIONS TAKEN	SYMPTOMS	PREVENTION
<p>1 Travelling from any foreign countries by last 2months</p> <p>2 Contacts to the people who is recently coming from overseas</p>	<p>Fever</p> <p>Coughing</p> 	<p>Stay at Home if You are Unwell</p> <p>Avoid Touching your Face, Nose and Mouth</p> <p>Stay 1.5 Meters away from people who are coughing</p>
